
Design Inspiration

PAGES

Blog

I like the single blog post style of blog1 and the commenting options. I'm structuring this page as an extended form of the individual posts seen in the index.html

Contact

1. CONTACT1
 - a. I plan to pull the upper contact section from contact1 to provide relevant and useful contact information
2. CONTACT2
 - a. I like the minimalistic and direct approach of the contact form in contact2, I'll be pulling the form structure and (hopefully) design style.

Events

I like the event types displayed and the postlike structure of the events list. I'll be adding the upcoming events list from the footer above the normal list of events as well for a better timeline
